## Important: Safety information about video games

### About photosensitive seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause photosensitive epileptic seizures while watching video games. These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

**Immediately stop playing and consult a doctor** if you experience any of these symptoms. Adults who allow teenagers (or children) to play the games should watch for or ask their children about these symptoms as they are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by playing in a well-lit room and by not playing when you are drowsy or fatigued. If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

### Play safely

Take a break from playing games at least every half hour. Stop playing immediately if you begin to feel tired or if you experience an unpleasant sensation or pain in your hands and/or arms. If the condition persists, consult a doctor. Use of vibration can aggravate injuries. Do not turn vibration on if you have any ailment in the bones or joints of your fingers, hands, wrists, or arms.

## CARE AND MAINTENANCE

Your game card and game deck are products of superior design and craftsmanship and should be treated with care. The suggestions below will help you protect your warranty coverage and enjoy your game for many years.

- Keep the game card and game deck dry. Precipitation, humidity and all types of liquids or moisture can contain minerals that will corrode electronic circuits.
- Do not use or store the game card and game deck in dusty, dirty areas.
- Do not store the game card and game deck in hot areas.
- Do not store the game card and game deck in cold areas. When the game deck returns to its normal temperature, moisture can form inside the game deck and damage electronic circuit boards.
- Do not attempt to open the game card or game deck other than as instructed in the user guide.
- Do not drop, knock, or shake the game card and game deck.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the game card or game deck.
- Keep the game card out of the reach of small children.

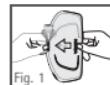

All of the above suggestions apply equally to your game card, game deck, and any enhancement.

## EXECUTING A SWING

It takes practice to execute the perfect swing. Practice these steps to hit shots where you want them to go.

### To execute a good swing:

1. Check the lie of the ball in the lower-right corner. If the ball is stuck in the rough or sand, you should consider setting up a safe, short shot onto the fairway before swinging for the green.
2. To check the target for the current shot, press Key 5 to enter Overhead View.
3. In Overhead View, the black crosshairs indicate where a shot with the currently selected club is likely to land, and the white crosshairs indicate the safest place to land your shot. Sometimes, the white crosshairs lie between clubs, so you have to adjust the power in your backswing accordingly.
  - ◎ To change the club in your hand, press Key 1 or Key 3.
  - ◎ For more information, see *Club Select* on p. 8.
4. Check the wind gauge, and the distance and elevation from the pin in the upper-right corner. Particularly on high lofted shots, the wind can push the ball away from your target. Adjust your golfer's aim as needed.
  - ◎ To change your golfer's aim, press the **Controller Left Key/ Controller Right Key**.
5. To return to Swing View, press Key 5.

6. To begin your swing, press and hold the **Controller Down Key**. The golfer draws back the club, adding power to your swing. When the club has risen to the desired height, press and hold the **Controller Up Key** to begin the downswing.

- ◎ To abort the swing, release the **Controller Key** before beginning the downswing.

### SHAPING FADES AND DRAWS

You can shape fades and draws using the following controls. For a right-handed golfer, a fade shot tends to curl to the right in the air. A draw tends to curl to the left.

- ◎ To hit a fade, press the **Controller Key ↘** to begin the backswing. A yellow streak indicates the amount of fade. To begin the downswing, press the **Controller Key ↙**.
- ◎ To hit a draw, press the **Controller Key ↙** to begin the backswing. A blue streak indicates the amount of draw. To begin the downswing, **Controller Key ↘**.
- ◎ For slighter fades and draws, start the backswing by pressing the **Controller Down Key** or finish the downswing by pressing the **Controller Up Key**.

**NOTE:** A poorly executed fade can result in a slice (a shot bending widely to the right), and a bad draw can result in a hook (a shot bending widely to the left). When shaping shots, use smooth and consistent motion.

### CLUB SELECT

Before you take a swing, make sure you have the right club in your hand. Check the target for the current club, and then make adjustments.

- ◎ To check the target, press **Key 5**. Then, to change the club, press **Key 1** or **Key 3** until the aiming target is over or near where you would like the shot to land.

### SHOT SELECT

There are up to seven types of shots that you can use on the course.

- ◎ To select a different type of shot, press **Key 5** to open the overhead view. To cycle the available shots, press **Key \*+**.

**FULL** Sets up a full swing with the selected club.

**PUNCH** A punch produces a full-swing shot with a low trajectory, minimizing the effects of wind. Use this shot when hitting from under a tree.

**APPROACH** Sets up a swing of moderate power for a shorter shot. Use this shot to place your ball on the green with minimal roll.

**FLOP** With a higher trajectory and less roll, this wedge shot can be used to fly over obstacles or to stick the ball on the green.

<b>BLAST</b>	When stuck in a greenside bunker, use this power shot to grab plenty of sand and to drive the ball out of a sand trap.
<b>PICK</b>	When stuck in a fairway bunker, use a pick shot to get the ball out of the sand and to generate some distance.
<b>PUTT</b>	When on the green, you putt the ball along the ground to the cup. You can use this shot only on the putting green.
